## WE MINIMISE THE RISKS FOR YOU

Increasing regulatory requirements, control obligations or personal liability - the challenges for companies are great. And are constantly changing. Effective compliance management minimises liability risks and brings further benefits.

Compliance has long since ceased to be a topic only for executive boards and supervisory boards of listed companies. On the contrary: compliance is becoming increasingly important, especially for small and medium-sized enterprises. The consequences for companies in the event of damage can be considerable. In the event of cartel violations, there is a threat of severe penalties, which in extreme cases can endanger the existence of the company.

We support you in identifying risky areas in your company and minimising liability risks. Our specialised compliance teams from the different departments develop a tailor-made compliance programme for your company, accompany you and your employees during implementation and support you with experienced lawyers in the event of a crisis.

### **Five good reasons - the benefits of a compliance programme for your company:**

**A continuously maintained programme** offers protection against antitrust fines, criminal proceedings against the responsible parties or recourse claims by inadequately informed shareholders.

**Clear guidelines and appropriate training** lead to special protection for your employees, e.g. in criminal corruption law.

**Living compliance** protects your reputation as a company that acts with integrity and responsibility.

**Compliance increases the value of a company** and can be a decisive investment argument in a company acquisition.

**A compliance programme** serves as proof to business partners that the legal regulations and standards relevant to the company are complied with.
